*“Nothing in life is to be feared, it is only to be understood.
Now is the time to understand more, so that we may fear less.”
- Marie Curie*

Summary

My counseling practice is driven by the belief that all people are capable of creating meaningful, purposeful lives for themselves using their own core values and strengths. My role as a therapist is to assist my clients in developing the skills and courage needed to translate their values into healthy, adaptive behaviors. I subscribe primarily to the Acceptance and Commitment Therapy (ACT) model of treatment, and I place emphasis on cognitive flexibility, mindfulness, somatic integration, and self-compassion as essential tools for growth and change.
